

SENTINEL PEST CONTROL SERVICES

"Integrated Pest Management Professionals"

COMPANY PROFILE

Sentinel Pest Control Services is a licensed Pest Control Operator (PCO) by the Fertilizer and Pesticide Authority (FPA) and is primarily engaged in exterminating destructive and disease-carrying pests. A professional pest control service group, which since its formation has been committed to providing services that protect and improve the environment where people work.

Our Mission:

- To ensure the protection of every Filipino home and business against pest and termite infestations through the use of quality pest control methods and Integrated pest management system that are environment- friendly, efficient and effective.

Our Vision:

- An environment that is secure, healthy and worry-free for people to live their lives and achieve the fruits of their labor.

Background

Sentinel Pest Control Services was established in Quezon City in 2001. Its founder, Mr. Emerson G. Soledad, is an industry expert who honed his skills and knowledge through years of study and training not only in the Philippines but as well as in Paris, London, Tokyo and Hongkong. The company began when Mr. Soledad and his son started servicing clients with just one hand sprayer and one Ultra Low Volume (ULV) Sprayer. To this day, the company has grown with more than 50 employees servicing numerous clients in the residential, commercial and industrial sectors of the country.

HOW WE DO WHAT WE DO?

SENTINEL PEST CONTROL SERVICES is here to help you maintain your high standards of cleanliness by offering our expertise in pest control.

As a Pest Control entity, our methods are constantly updated that help us effectively control cockroaches, mosquitoes, flies, rodents and numerous other pests for ours is a unique system of pest control tailor-fit to address your specific concerns with the use of modern technology and treatment methods.

SENTINEL recommends the use of the **Integrated Pest Management System**, a multi-level program that has been designed to meet your pest control needs. Focusing on **pest prevention** at the onset, i.e. protecting the structural core of the establishments is our priority while maintaining a good eco-friendly usage of chemical application to the area/s of infestations.

INTEGRATED PEST MANAGEMENT SYSTEM

The IPM is a wise decision- making process that anticipates and prevents pest activity and infestation by combining several strategies to achieve long term solution.

It requires a holistic approach encompassing cultural, biological, mechanical, chemical and non-chemical control that are combine in a compatible manner to reduce pest infestation to much tolerable level without any undesirable impact to health and on the environment.

BENEFITS IN USING INTEGRATED PEST MANAGEMENT

- Pest Prevention
- Creates awareness
- Less reliance on Pesticides
- Improve maintenance
- Long term solution
- Precise pesticide application

IN ACTION

SENTINEL only uses chemicals that have been tested and approved for use by the Fertilizer and Pesticide Authority (FPA) and Food and Drug Authority (FDA) and those are safe. Our Integrated Pest Management System controls the pest infestation with minimal dependence on chemicals for we focus on environmental and human safety. Also, our highly trained personnel, working hand in hand with your designated staff, will implement the facets of the IPM (Sentinel Integrated Pest Management System).
